

# Release Note for VigorAP 810

Firmware Version:	1.2.3.1
Release Type:	Normal
Applied Models:	VigorAP 810

With this high cost-efficiency VigorAP 810, computers and wireless devices which are compatible with 802.11n can connect to existing wired Ethernet network via this VigorAP 810, at the speed of 300Mbps. Easy install procedures allows users to setup a network environment in very short time - within minutes, even inexperienced users. Just follow the instructions given in this user manual, you can complete the setup procedure and release the power of this access point all by yourself!

## New Features

- None.

## Improvement

- Improved: A wireless vulnerability, known as 'KRACK' was discovered in October 2017. This affected wireless clients, including phones, tablets, laptops and also any wireless base acting as a client.  
For full details, see <https://www.krackattacks.com>. The recommended action in all cases is to upgrade your client devices as that is where the vulnerability lies however if that is impossible because the product is too old or the vendor does not provide updates, it is possible to mitigate KRACK exploitation by disabling EAPOL-Key retries on the base station and reduce the possibility of KRACK being used. For more details, see <https://www.krackattacks.com/#ap-mitigations>. That can be done from "Wireless LAN >> Security Settings" on the access point. Upgrading your client is still the preferable solution.

## Known Issue

- None.

## Notes

- None.
