Release Note for VigorSwitch P2540xs

Firmware Version:	3.9.4
Loader Version:	3.5.1
Release Type:	Normal - Upgrade recommended when convenient
Applied Models:	VigorSwitch P2540xs

VigorSwitch P2540xs, the L2+ Managed Switch (48 Gigabit/PoE Ports and 6 SFP+ Ports), is a standard switch that meets both IEEE 802.3u/ab Fast Ethernet and Gigabit Ethernet specifications. The data transmission rate reaches to up link 10G with the power budget up to 400w.

New Features

● None.

Improvement

● Improved: Password mechanism changed to force admin to change the password from the default password.
● Improved: Also include the following updates
   - Increase the ICP table size to 1024.
   - Add Port Description on the Bandwidth Utilization page.
   - Modify the configuration process for the LAG page.
   - Add Firmware release notifications.
   - Adjust the Syslog display time to accommodate daylight saving time.
   - Display information about SFP+ ports on the dashboard.
   - Modify the management ports configuration.
   - Include device MAC address in Syslog.

Known Issue

● Unable to downgrade the switch using the firmware version below 2.7.x if the loader version used currently is 3.5.1.
